USER TASKS -----

Create a new project and edit the scale of it

1. Click Get Started
2. Click on the plus sign in the upper right corner
3. Edit the name and choose the scale (not interactive in figma but there in concept, filled in as 'Project Name 6' and 1in:1in for visual purposes)
4. Click Create Profile at the bottom of the page
5. Click on the name of the newly created Project 6 to view information about it.

Import the design in the sandbox to an already created project

1. Click Get Started
2. Click 'Project Name 5' (an example project)
3. Click yes
4. Wait for the scan to complete (click the link to signify the 'scan completing')
5. View preview of the newly scanned project

Edit sandbox properties

1. Click Get Started
2. Click the gear icon in the upper left hand corner
3. Edit the y value to scan at and the default scale assigned to all projects unless specified otherwise
